

Serving Your Patients— and their Families

The Division of Pediatric Hematology/Oncology

State of the art care—delivered with a warm and personal approach—is the hallmark of the Division of Pediatric Hematology/Oncology at Mount Sinai. The Division provides care to outpatients in a newly renovated facility and has numerous dedicated inpatient beds in the Kravis Children's Hospital at Mount Sinai.

Patients and families referred to the Division can expect:

- A commitment to patient and family comfort and education; every child is treated as an individual, not a case
- Highly experienced interdisciplinary team of healthcare professionals made up of physicians, pediatric nurse practitioners, social workers, child-life specialists and nutritionists
- Comprehensive medical treatment utilizing the expertise of all Mount Sinai pediatricians and other specialists across various disciplines
- Family-friendly facilities that help relieve the stress associated with illness and treatment, including, as of February 2006, access to The Zone, a high-tech interactive play area for all pediatric inpatients that has been funded by The Garth Brooks Teammates For Kids Foundation in partnership with the Troy Aikman Foundation and the Starlight/Starbright Foundation.
- For eligible patients, access to participation in ongoing international research
